"Quebracho Colorado" (Quebrachia Lorentzii) ..

A large forest tree, native of the Argentine, where the very hard and durable wood is used for railway-sleepers, piles, bridges, beams &c. From the wood reduced to chips, a catch-like extract is obtained. This is exported to the extent of nearly 100,000 tons a year to the United Kingdom, United States &c. for tanning purposes. A tannin extract in a finely powdered condition is also imported into this country from the Argentine, and according to a recent Consular report, the wood in logs finds a market in Russia.

smooth skinned lbrd, red flattened race	530
similar but much smaller	532
somewhat rough but smooth, pink skinned, long - pointed flattened	534
white flaked, skinned: very much flattened + lbrd.	536
white flaked, smooth - lbrd: rarely flattened	538
apparently same race as last	540
pink skinned, flattened and fingered	542
bumpy gran, slightly lbrd; a little rough, red.	544
little gran red skinned 2-lbrd.	546
long, unbranched, rough skinned gran, pink skin.	548
like last, but smoother & redder.	550
cupped shaped, slightly rough, white skin	552
are uncovered tubers otherwise like the last.	554
a very big tuber apparently of the same race as the last - (broken into 2)	556
looks like a cast from tuber of the last.	558
like the last but shorter & pink skinned.	560
like the last but one	562
neat egg shaped small tubers, pink skin	564
neat long-egg shaped small tubers white skin	566
stick like deep finger white skinned (broken into 3)	568
ubium caryocarpum - white skin.	570
do do for red skin	572
apparent looks the same as the last.	574
attached to like Kumpston	576
very flattened & very branched	578
top shaped tubers	580
smooth acrial tubers	582
Botulinata tubers	584
